

Your Online Resource to a Safe Patient Handling and Mobility Program

Safe Transfers and Movement™ Program: Online Toolkit

At Hill-Rom, we recognize each organization has individual missions, goals, value and service to the surrounding community. Each functions and implements change differently. As a result, we are offering you a resource designed to help you readily implement a Safe Patient Handling & Mobility (SPHM) Program. The tools can be customized to suit your organization's goals.

Safe Transfers and Movement™ Program

The Safe Transfers and Movement™ Program Online Toolkit is your 24 hour / 7 days a week-resource for implementing your SPHM program.

Design, Implementation and Beyond

Hill-Rom has designed Six Steps of a Successful SPHM Program as a framework. Each step can help facilitate progress of your SPHM Program through program design, implementation and beyond.

Following this framework, the Online Toolkit organizes tools to align with each step and offers the right resource at the right step — exactly when you need it.

Self-Guided, One-Stop Resource

This toolkit is designed to be a self-guided, one-stop resource for your program needs. It offers a step-by-step approach with tools, industry research and information and customizable templates to support your program development and implementation.

Six Steps of a Successful SPHM Program:

1. Understand Your Challenge
2. Gain Administrative Support
3. Design Your Program
4. Choose and Use Equipment
5. Implement Your Program
6. Measure Quality Improvement

Benefits of the Online Toolkit

- Information is available 24/7.
- Access or review program tools anywhere with internet access.
- One site with numerous resources saves time from looking up and retrieving information from multiple sites.
- Your program design, implementation and sustainment may be supported by one site.
